## Product Description

### What is 99% Factory Supply Tissue Building Cosmetic Peptides Glutathione Cas 70-18-8?

Glutathione is a substance made up of the amino acids glycine, cysteine and glutamate. It is produced by the liver and is involved in many bodily processes.

Glutathione is involved in tissue building and repair, the manufacture of chemicals and proteins needed by the body, and in immune system function.

People take glutathione for anti-aging, alcohol use disorders, liver disease, heart disease and many other diseases, but there is no good scientific evidence to support these uses.

#### Glutathione has many important functions, including :

- Making DNA, which is a building block for proteins and cells
- Supports immune function
- Forming sperm cells
- Breaks down some free radicals
- Helps certain enzymes to function
- Regenerates vitamins C and E
- Carries mercury out of the brain
- Helping the liver and gallbladder process fat
- Assist in normal cell death (a process known as apoptosis)
